ISMAIL SAIH

Engineering Student in Digital Sciences (SN) at ENSEEIHT
Passionate about Cybersecurity and Applied Cryptography

+33 7 73 53 27 35 ismail.saih@etu.toulouse-inp.fr

PROFILE

As a first-year engineering student in Digital Sciences (SN) at ENSEEIHT, following an intensive two-year CPGE MP program in Mathematics and Physics, I am passionate about cybersecurity, applied cryptography, and secure software systems. Having developed a strong foundation in modular arithmetic and algorithmic analysis, I am seeking an environment where I can contribute to security engineering challenges.

SOFTWARE SKILLS

LaTeX	●●●●●
Python	●●●●○
Ada	●●●○○
SQL	●●●○○
Linux	●●○○○
Git	●●○○○

LANGUAGES

- ✓ **Arabic:** Native
- ✓ **English:** Fluent (C1)
- ✓ **French:** B2 level

PERSONAL EXPERIENCE

Strategy Games:

- **Chess & Draughts**
  Pattern recognition, tactical calculation, and decision-making under time constraints.

Sports:

- **Football**
  Team spirit, collective coordination, and perseverance.

Culture & Literature:

- **Classical Arabic Poetry**
  Literary composition, analytical reading, and attention to structure.

FORMATION

2026 – 2029 **Engineering Degree**
Toulouse *ENSEEIHT – Sciences du Numérique (SN)*
Major in Digital Sciences: Systems Architecture, Computer Networks, Algorithmics, Relational Databases, and Imperative Programming.

2024 – 2026 **Preparatory Classes**
Morocco *CPGE MP (Mathematics & Physics)*
Intensive two-year undergraduate program preparing for competitive entrance examinations: Advanced Algebra, Modular Arithmetic, Analysis, and Physics.

2024 **Baccalauréat Mathématiques**
Morocco *High School Diploma*
Obtained with Honors (Mention Bien). Specialization in Mathematics and Physical Sciences.

ACADEMIC EXPERIENCE

2025 – 2026 **Supervised Research (TIPE)**
Morocco *Pollard's Rho Algorithm in Modular Arithmetic*
Conducted an in-depth mathematical study of cycle-detection methods in modular arithmetic and their application to integer factorization. Implemented Pollard's rho algorithm in Python to evaluate empirical time complexity across large prime factors.
Skills: Python, Modular Arithmetic, Cryptanalysis.

2026 **Software Coursework**
Toulouse *ENSEEIHT – Department of Digital Sciences*
Designed and tested structured terminal applications in Ada using step-by-step algorithmic refinement. Modeled relational database schemas in SQL and studied network protocols.
Skills: Ada, SQL, Linux Environment, Algorithmic Design.

2024 – 2026 **Academic Mentoring**
Morocco *Private Mathematics Tutor*
Provided one-on-one mathematics tutoring focusing on proof methodology, structured problem solving, and exam preparation.
